

Field Day 2018

ACARC will participate in field day this year on Saturday June 23 from 12:01pm to about 8:00pm at Ogden Park. We will be at shelter #2 with 2 stations . We start setting up at noon and need help with the antenna's and operators.

This year we hope to demonstrate that small antenna's can work. We have constructed a magnetic loop antenna to operate as our prime station on 20 meters. We also will have a second station to operate 6 meters

We will have a vertical antenna that can be tuned to work any band if someone wants to work cw or digital.

We will be operating as a 1A station with portable generators.

We are still in the planning stage for an evening barbecue meal. Final planning at the club meeting on Tuesday 19th .
